This screen attached those matches by following the hull's documented rename audit trail. The 'linked via' chip shows the prior name; verify against the source list before acting.

This report is generated by Strait Up Maritime against data aggregated from 9 international sanctions lists. Matches labelled ✓ IMO match are anchored on the vessel's IMO number. Matches labelled ▶ linked via [name] are surfaced by following the hull's documented rename audit trail to publishers that don't include IMO in their feeds (UK FCDO, EU FSF, FR Trésor, BE FOD, CH SECO, PL MSWIA, MC, AU DFAT). All matches are screening intelligence — sanctions designations change without notice and require verification against official sources before any compliance determination. straitupmaritime.com/terms
